

Stop Out Survey
Spring 2022

May 2, 2022

Prepared by: **DASA** Assessment

Survey Overview

In January 2022 DASA Assessment emailed a survey to students who were enrolled at NC State during the fall 2021 semester but did not re-enroll for spring 2022 semester. Students leave college for a variety of reasons, and the Stop Out Survey seeks to gain a better understanding of why our students decide to dis-enroll and provide any resources that may be needed to help a student become re-enrolled. This is the first semester that the survey was administered in the spring. The spring survey was shorted in hopes of increasing the response rate.

The spring 2022 Stop Out population consisted of 723 students. The survey was administered January 11-28, 2022. Approximately 15.5% (N=112) of the students in the population submitted a complete or partial response.

The questions provided students with a list of reasons why they may have decided to leave. Students were asked to rate the effect of each particular reason on their decision to dis-enroll. They were also provided space to share reasons that may not have been on the pre-populated list. Students were asked to name any office or person on campus they may have reached out to for assistance with their decision. Other factors were addressed as well, including employment status while at NC State, future plans to continue their postsecondary education, and overall experience while enrolled.

Highlights

Representativeness

Female students were overrepresented at 58.0% of respondents but only 41.2% of the Stop Out population. Differences between the sample and survey population with respect to race/ethnicity and college were all <5%, with the exception of the College of Agriculture and Life Sciences which was overrepresented. Survey respondents were disproportionately in good academic standing (71.4%) compared to the population (57.4%).

Reasons for Dis-enrolling

Students were asked to indicate the reasons they dis-enrolled from NC State for the spring 2022 semester (Table 9). **The most common reasons for not enrolling were: life events (e.g., family, health, military obligations), the stress of school work, and lack of friends or social networks on campus.**

Future Plans

49.6% of respondents "strongly" or "somewhat" agreed that they planned to return to NC State. 76.1% of respondents "strongly" or "somewhat" agreed that they could succeed at NC State (Table 10). Finally, in most cases a smaller percent of students received help when they were considering dis-enrolling than requested it (Table 11).
